

## Ocular 2/4 LED S100

Light source: LED 14W

The lamp has been designed and built in accordance with applicable harmonised standards and other technical specifications. It is therefore state-of-the-art and ensures safe operation. The lamp may only be used for the intended purpose.

**Front view**

**Note:**

Hang the lamp at eye level or just slightly higher. This prevents being dazzled by the light. The safety distance from the ceiling and from, e.g. a table below the lamp, must be a minimum of 0.5 m.

**ATTENTION!**

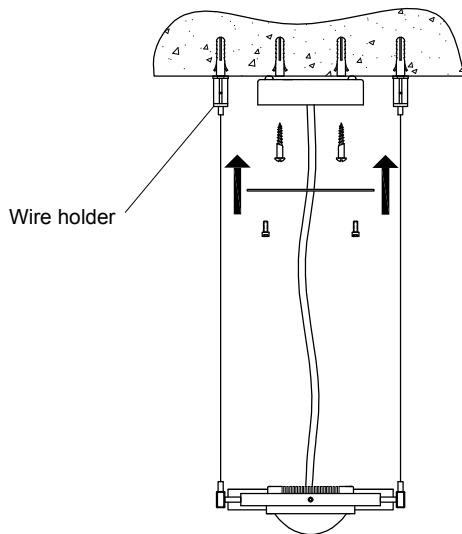

The connection cable must be isolated from the mains before assembly.

**Assembly:**

It is recommended that assembly is implemented by a specialist company. We ask for your understanding that we can only offer a guarantee if assembly is implemented correctly.

- ① Lay the lamp on the table or floor and position it according to where you want it, e.g. over the table or in the room.
- ② Align the securing points on the ceiling and mount the wire holders on the aligned points.
- ③ Mount the housing of the ceiling box at the required position.
- ④ Guide the cable through the cover of the ceiling box, leave it lying on the lamp for the time being.
- ⑤ Screw the wire end with the threaded part into the frame of the lamp and guide the other end of the wire into the wire holder.
- ⑥ Lift the lamp to the required height and then shorten the protruding wires.
- ⑦ Pull the cable through the strain relief clamp in the mounting box and pull it through. Adjust the cable so that it forms a light S shape.
- ⑧ Trim the cable and then connect it.
- ⑨ Push the cover up and fasten in place with the fastening screws.

**Side view**

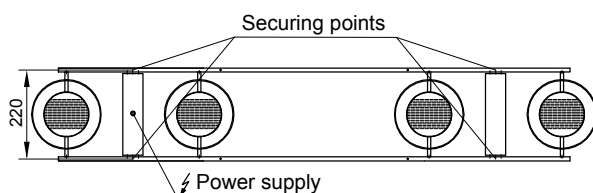

**Dimming:**

The lamp **cannot** be dimmed!

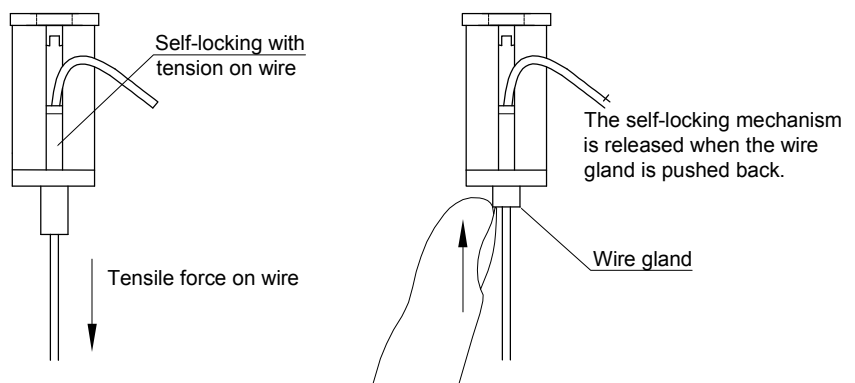

**Cleaning:**

We recommend cleaning the lamp with a soft, dry cloth. A commercial glass cleaner can be used to clean the lens.

**Wire holder principle:**

## Lamp: Ocular LED - Pendant lights - Chandeliers - Wall lights

These operating instructions are exclusively for these products. It contains important information on commissioning and installation handling the luminaire. Therefore pay attention to these operating instructions, even if you use this product to a third party pass on.

Therefore, it is important that you keep this manual for future reference.

### 1. Introduction

You have purchased a product from the company "Licht im Raum Dinnebier GmbH", which was built according to the current state of technology. The luminaire meets the requirements of the applicable European and national directives. In order to maintain the condition of the product and to ensure safe operation, you must observe these operating instructions and the associated installation instructions.

### 2. Safety instructions

- Damage caused by not observing these operating instructions will void the warranty!
- We accept no liability for consequential damages!
- In the event of damage to the luminaire, commissioning is strictly prohibited.
- Do not allow children to be left unattended in the area of the lights or other electrical equipment.
- During operation, the lamp can become hot. Keep min. 0.5m distance to ceiling and to all other walls and objects.
- Do not expose the luminaire to extreme heat or to an open flame.
- The entire product may not be altered or altered. Changes to the luminaire will void the warranty.
- The type plate must not be removed.

### 3. Intended use

- The luminaire is designed for use in dry and protected indoor areas.

**This product is for lighting purposes only and may:**

- only be operated with a voltage of 230V ~ 50Hz.
- only be connected according to protection class I (one).
- only be operated in the correct and fixed state.
- are not subjected to strong mechanical stress or heavy soiling.

### 4. Before installation / commissioning

- The luminaire may only be operated outside the packaging.
- Carefully remove the lamp from its packaging.
- Before using the luminaire, make sure that the product hasn't been damaged on its transport route.  
The luminaire may not be operated if the electrical parts are damaged.  
Repairs may only be carried out by a specialist electrician.
- Keep packaging material away from children and pets. Suffocation!

### 5. Installation / Commissioning

- This product may only be installed by qualified electricians.
- Before installation, the connecting cables on the building side must be disconnected from voltage and secured against being switched on again. To do this, unscrew the appropriate fuse devices from the house installation.
- Ensure that the substructure or the ceiling construction is suitable for carrying the weight of the luminaire permanently and reliably.
- Use suitable fixing material to secure the luminaire. Make sure that no wires are damaged.
- Do not bend the cable; please ensure that the cables and connectors are free of tension and torsional forces. Protect all cables and insulation from possible damage.
- Before commissioning, check the correct connection again.

### 6. Technical specifications

230 V AC ~, 50 Hz, IP 40

### 7. Care

- Before you carry out any cleaning or care measures on the product, first switch the entire product free of voltage and allow it to cool down.
- Clean the product regularly - only with a soft and lint-free cloth. Please observe the enclosed instructions.
